Dear Ladies & Gentlemen,

This letter is to express our concerns over the proposed new broadcast service known as Low Power FM, addressed in MB Docket #04-233.

We two and several friends and family members enjoy on a daily basis the programming offered by K-LOVE radio thru our local translator (89.5 and 91.7 FM. If we did not have these local translators, we would not be able to receive the broadcasts from K-LOVE radio and that would leave a huge void in our daily lives.

We know of many young people who listen regularly to the music and inspirational/teaching programs offered by K-LOVE, and if our local translators were to be replaced by this new proposed broadcast service countless families would be impacted in a very negative way.

It has been proven by historical accounts, not only in the religious surveys but also in general social studies, that what a community listens to and hears on a regular/daily basis has a huge impact on how they react/act in their community and how they perform as citizens in that community.

We feel that losing the programming offered by K-LOVE radio through our local translators would have a great negative impact on our local community.

Please do not make a decision in regards to the service you choose for broadcasting radio to the people in the United States that will have such a grossly negative impact on our people as would your choosing the new broadcast service known as Low Power FM!!

Thank you for your consideration of our opinions and we look forward to learning of your decision.

Sincerely,

John and Rhonda Castner
